Introducing the Mercedes AA class, a luxury car powered entirely by batteries
Hmmm.... [Watch the announcement](#) of this incredible technological breakthrough. Alain

McLaren's Carbon Fiber Feather Wrap Takes Lightness to New Levels

A. Brown, Mar 31, "...McLaren announced ... in a press release that it will be offering a feather wrap on the McLaren 570GT through the McLaren Special Operations Division. With that option (which almost definitely doesn't actually exist) selected, MSO will spend 300 hours applying 10,000 "carbon-veined" feathers to the 570GT, according to the release...." [Read more](#)
Hmmm... Please make it Driverless. Alain

Lyft's Mono Promises Hands-Free Ride-Hailing

S. Edelstein, Mar 31, "Using a ride-sharing or ride-hailing app doesn't exactly require much physical exertion (it certainly beats walking), but Lyft claims to have a device that can make the process even easier.

It's called the Mono, and in a blog post Lyft said it enables "autonomous ride hailing." That refers to the ability of users to hail a ride without their phones, and isn't related to self-driving cars. ..." [Read more](#) *Hmmm... Thank you for making it even easier. Alain*

[Best... by car companies](#)

J. Holding, Apr 1, "...here are the best...from the motoring world, as remembered by the team here at Auto Express..." [Read more](#) *Hmmm... Especially the everquote ad at the top. It must be one too. Alain*

:-)
